

Brand Guidelines

Who we are. What guides us. How we show up.

Internal — Monsey & Pomona

STARTING POINT

We need to know who we are.

To grow in the right direction, we need to have clarity on who we are — not just as a brand or as a business, but to define our identity both internally and externally.

Having our identity and mission before our eyes informs our decisions and concentrates our efforts in the right direction.

By knowing who we are internally, we can create the environment we want a patient to experience when they walk in the door.

**Identity first.
Everything else follows.**

WHY NOW

The need for one cohesive identity

We are still in the process of transitioning to the brand we want to become. This has been behind all of our efforts in the last year.

However, as we move into our next phase of growth, we need to tighten our brand and sharpen our identity to be cohesive and speak with one voice.

We don't want to change how we are known.

We want to consolidate it — and allow all of our specialties and providers to contribute to one singular cohesive brand identity.

WHERE WE STAND

Right now, we have different expectations from patients in different locations.

Some know us as

Lev Family Health

Some know us as

Lev Pediatric Care

Some still know Monsey as

An urgent care

Some know

**One provider and
nothing else**

Four different expectations. One practice.

Identity is a standard. And it helps make decisions.

- We cannot expect our staff to adhere to standards that are not clearly communicated, and we cannot make decisions without a compass to guide us.
- Our identity guides how we operate — from high-level business decisions to everyday interactions with patients.

**Our identity gives
us the why.**

Making the how a whole lot
easier.

SO, WHO ARE WE?

Lev

we bring heart to every interaction.

Family

we treat patients like family.

Health

we focus on clinical excellence before all else.

OUR MISSION STATEMENT

Lev means heart, and that's the standard we hold ourselves to. Lev Family Health cares for families in Rockland County across every stage of life — from a child's first checkup through an adult's ongoing care. We are one practice with two homes, in Monsey and Pomona. We treat every patient like family, which means we go the extra mile, we meet people where they are, and we don't turn anyone away.

What guides us

1

Heart in every interaction.

Every call, every check-in, every visit. The name is the standard. We always bring our heart into the decision-making process. When facing a patient, we feel their heart, and we make them feel cared for.

2

Every patient is family.

If we wouldn't do it for our own, we don't do it here. We proactively care for them. We are genuinely interested in their well-being. When we ask how are you, we mean it. And we always go the extra mile.

3

We meet patients where they are.

We are here to serve. We are always culturally fluent, communally present, accountable to the people we live among. We are actively caring for our patients to feel at home here.

HOW WE SHOW UP

We are one practice

ONE

practice

Lev Family Health

TWO

homes

Monsey · Pomona

FOUR

services

Adult Primary Care · Pediatrics
Women's Health · Walk-In &
Acute Care

Locations are modifiers, not separate brands: Lev Family Health — Monsey. Lev Family Health — Pomona.

The rules we hold to

- **One name.**

Always Lev Family Health. Locations are modifiers: Lev Family Health — Monsey. Lev Family Health — Pomona.

- **One message, in this order.**

One practice for the whole family. Two locations, same practice, same record. Walk-in availability when you need it. Insurance stability and access.

- **Our promise.**

We will always do our best, work with heart and treat you like family.

- **One look.**

One logo, one color system, one voice. No separate identity for any location or service line.

- **What we lead with.**

Primary care first. Walk-in availability is a convenience for our patients, not the headline.

- **What we don't say.**

No wait-time promises. No superlatives. No clinical claims.

WHAT DOES THIS MEAN?

This is not just about marketing. It's our internal north star.

The standards we hold ourselves to.

- Every new service, location, or partnership gets tested against the mission before it gets a name.
- Every hire and every role is trained on our values and evaluated on them.
- Every operational decision is held against the values. Turning a patient away, closing early, leaving a gap in coverage — those are brand failures, not just service failures.
